CONTEST HISTORY
In April of 2020, at the start of quarantine, Oscar-nominated cinematographer Lawrence Sher, ASC and his wife, creative director Hema Patel, started to recreate famous movie shots from their home using just their cell phones, household props and their family as actors. Under the hashtag #shotsinisolation, their images quickly went viral. In conjunction with the filmmaking research website ShotDeck.com, they established a contest where people from around the world could join in the fun by recreating their favorite movie frames as meticulously and creatively as possible. 2023 marks the 3rd edition of the recreations contest and it’s only just getting started...
